THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES, WITHIN THE MEANING OF TITLE 18, SECTIONS 793 AND 794, OF THE U.S. CODE, AS AMENDED. ITS TRANSMISSION OR REVELATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION 50X1-HUM

1. Seepolizei Craft

- a. The DORSCH is now off the slips and the fitting-out work, mainly electrical, is being completed while the vessel is in the water. It is now hoped that the DORSCH will be complete by the end of August. It is anticipated that the maneuvering of this vessel, approximately 60 meters in length, from the Peene River seawards will present some difficulty because of the narrowness of the river.
- b. The FUERSTENBERG (961) and the PRENZLAU (962) have left and are in Parow, north of Stralsund.
- c. The WISMAR is on the slips and, like the DORSCH, is being fitted with a "Maierbug" (special shaped bows after the patent of an Austrian engineer named Maier). The work is being hastened and it is hoped to have the WISMAR complete at the end of August. The WISMAR, described as an ocean-going tug (Hochseeschlepper), is also to be armed with 1 AA gun, and one "cannon".
- d. The ex-FRIEDRICH-KARL had no work done on her during June.
- e. There was nothing special to report on the movements of SK- and R-boats.

- 2. The new shipbuilding hall cannot be put into use as power cannot be supplied because of the non-delivery of the required transformer and cable.
- 3. The Construction Office under Schlaak is still in Wolgast, although there are still rumors of its impending move from there.
- 4. Magnetic Mine Detection Device

Seven of these are to be built at Peenewerft. The metal plates to encircle them will have to be sent to another factory for shaping, after which they will be
